

Please help Susan

This is Susan Achien. The woman in the photo is her late mother, who was a Christian, and who passed away in 2020. Susan is a 13 year old South Sudanese orphan who lives in the Bweyale Refugee Camp in Uganda. Her right leg was badly damaged from an accident as an infant. She is unable to walk on this leg and has daily pain from the injury. She struggles to find work to buy food or medicine because of her handicap. The Sudan Project supports her through the oversight of one of our trusted and supported preachers and now we are going to arrange surgery for her leg to improve her future. This will allow her to be able to walk, live with less pain, and be able to someday support herself. Our goal is to raise \$15,000. The money will be used for her to travel to the hospital in Kenya, pay for the surgery and therapies she needs, and have food, lodging, and medicine. Surgery and follow-up therapies are expected to require she stay in Kenya for 75-90 days. Additional funds raised beyond surgery and treatment costs will provide her with clothing, food, and the opportunity to go to school. The Sudan Project will oversee all funds and work with the known and trusted preacher who will accompany her to Kenya from the refugee camp as her guardian.
